Choctaw Health Center continues to strive to maintain the health and well-being of our communities during the COVID-19 pandemic. As a preemptive and precautionary measure to prevent the spread of COVID-19, we will have temporary process changes throughout the healthcare system.

Effective March 16, 2020, the following processes have been implemented:

- All patients, visitors, and employees reporting to the facility must complete a health screening assessment form.

- A designated tent and mobile site for patients who may present with symptoms similar to the COVID-19 virus will be guided to the emergency room entrance where patients will be further questioned prior to entering our facility.

- The health center main entrance will be operational from 7:00 am-6:00 pm, Monday through Friday. On Saturday and Sunday, the main health center entrance hours will be from 9:00 am-1:00 pm. It is highly recommended for patients to pick up their prescriptions during the normal business week to allow for our hospital staff to sanitize the hospital for the following week.

Please pay attention to the signage located around the facility for directions. We want to thank you for your continued patience as we take the necessary steps in decreasing the spread of the COVID-19 virus.
