

PUBLIC NOTICE

Pharmacy

As the novel coronavirus (COVID-19) continues to spread, we understand you may have concerns about accessing prescription medications, especially if you or loved ones have chronic conditions.

Choctaw Health Center Pharmacy will allow patients to get early refills on chronic medications excluding control substances, starting immediately. We encourage our patients to request refills during the week as opposed to the weekends to ensure that wait times are kept at a minimal.

The Centers for Disease Control and Prevention (CDC) encourages people to stay at home as much as possible to prevent COVID-19 transmission, this convenient option can help you have an additional supply of your medications.
